

IRRIGATION SYSTEM NOTICE

Due to continuing severe drought conditions, The Southwest Florida Water Management District has extended lawn watering restrictions to October 1, 2026.

During this time lawn watering is limited to one day per week for residents' properties.

To comply with this order our community's pump will not operate on Saturdays and Sundays until October 1, 2026. It will still run on Wednesdays and Thursdays. Please adhere to the schedule posted on our website.

It's essential everyone complies with this restricted schedule. Our well pump has limited output capacity and may not be able to supply sufficient water if demand is too high.

For more information, please refer to the Phase III water restrictions at Manatee County's website: mymanatee.org

Also see crystallakeshoa.com for additional information that pertains to our community's irrigation system including the time schedules.
