

# IRRIGATION SYSTEM NOTICE

Due to severe drought conditions, The Southwest Florida Water Management District has implemented lawn watering restrictions from February 8 through July 1, 2026.

During this time lawn watering will be limited to one day per week for residents' properties.

To comply with this order our community's pump will not operate on Saturdays and Sundays through July 1, 2026. It will still run on Wednesdays and Thursdays. Please adhere to the schedule.

It's essential everyone adheres to this restricted schedule. Our well pump has limited output capacity and may not be able to supply sufficient water if demand is too high.

For more information, please refer to the Phase II water restrictions at Manatee County's website: [mymanatee.org](http://mymanatee.org)

*Also see [crystallakeshoa.com](http://crystallakeshoa.com) for additional information that pertains to our community's irrigation system including the time schedules.*
